PROFESSIONAL VALUES & ATTRIBUTES

Develop your own judgment of what works and does not work in your teaching and training.

1. Reflect on what works best in your teaching and learning to meet the diverse needs of learners.
2. Evaluate and challenge your practice, values and beliefs.
3. Inspire, motivate and raise aspirations of learners through your enthusiasm and knowledge.
4. Be creative and innovative in selecting and adapting strategies to help learners to learn.
5. Value and promote social and cultural diversity, equality of opportunity and inclusion.
6. Build positive and collaborative relationships with colleagues and learners.

PROFESSIONAL KNOWLEDGE & UNDERSTANDING

Develop deep and critically informed knowledge and understanding in theory and practice.

7. Maintain and update knowledge of your subject and/or vocational area.
8. Maintain and update your knowledge of educational research to develop evidence-based practice.
9. Apply theoretical understanding of effective practice in teaching, learning and assessment drawing on research and other evidence.
10. Evaluate your practice with others and assess its impact on learning.
11. Manage and promote positive learner behaviour.
12. Understand the teaching and professional role and your responsibilities.

PROFESSIONAL SKILLS

Develop your expertise and skills to ensure the best outcomes for learners.

13. Motivate and inspire learners to promote achievement and develop their skills to enable progression.
14. Plan and deliver effective learning programmes for diverse groups or individuals in a safe and inclusive environment.
15. Promote the benefits of technology and support learners in its use.
16. Address the mathematics and English needs of learners and work creatively to overcome individual barriers to learning.
17. Enable learners to share responsibility for their own learning and assessment, setting goals that stretch and challenge.
18. Apply appropriate and fair methods of assessment and provide constructive and timely feedback to support progression and achievement.
19. Maintain and update your teaching and training expertise and vocational skills through collaboration with employers.
20. Contribute to organisational development and quality improvement through collaboration with others.

Professional Standards

The Professional Standards were developed in 2014 by the Education and Training Foundation (ETF). They were developed in consultation with practitioners and providers from across the sector, and define common expectations.

15. Promote the benefits of technology and support learners in its use.

Presentation summary

Welcome

"We are living in a digitally enabled world where technology is increasingly part of our society. We owe it to our young people, and to anyone who wants to up skill, to do more to explore and reap the benefits that technology can bring."

– Damian Hinds

Key Questions

- 01** Where are we now?
- 02** Why make changes?
- 03** Where are we going?
- 04** How are we going to get there?

Open University Research

In June 2019, the Open University published their 'Bridging the Digital Divide report', to highlight the extent of the digital skills gap and the impact it is having on organisations in Great Britain.

88% of organisations polled as part of the report admitted they have a shortage of digital skills, which is already having a significant negative impact on productivity, efficiency and competitiveness.

27%

have redirected their training budget to focus on digital skills.

NEW Education Inspection Framework

Learning technologies have an important place in the classroom. Ofsted is primarily concerned with the curriculum and whether students and apprentices learn and remember what they need to know and do.

While learning technology has an important role to play in supporting teaching and securing learning, how teachers teach is very much up to them. The overriding factor in any judgement about the quality of education is the extent to which teachers enable students or apprentices to learn.

Providers need to think about how well teachers can use technology in the classroom – is it just a filler, something to engage learners because it's different, something to add variety? Too often, for example we see teachers using interactive whiteboards as white walls on which to project PowerPoint slides without using the interactive facilities to enhance learning. Teachers need to think about the pedagogical implications of using technology to help learners develop and acquire the powerful knowledge they need to deepen their learning and enhance their skills.

Providers need to ask themselves: What are we planning to use? How will it meet the needs of learners and managers? Why is it better than what you do already? What impact will it have on learning and progress?

Chris Jones, Specialist Adviser for Learning and Skills

The education inspection framework

Framework for inspections carried out, respectively, under section 5 of the Education Act 2005 (as amended), section 109 of the Education and Skills Act 2008, the Education and Inspections Act 2006 and the Childcare Act 2006

The education inspection framework sets out how Ofsted inspects maintained schools, academies, non-association independent schools, further education and skills provision and registered early years settings in England.

Teachers check learners' understanding effectively, and identify and correct misunderstandings

Recommendations:

EB - Use of formative assessment tools (Microsoft and Google forms, etc) to check understanding and can identify misunderstandings

SH - Students create vlog/ podcast/ screencast evidence of progress and Staff respond in kind eg English Teachers vlogging back to the students update vlogs

SH - Comments using the 'comment bank' in Google Classroom

SH - Capturing the natural classroom feedback in class eg mobile recording of audio and then adding it to the thread of feedback on the VLE/ Assignment space for the learner to revisit

KB - Google Forms to collate data for assessments purposes

KB - Video recordings (via mobile, desktop) shared to online drives for accessibility - anytime, anywhere.

FM - Use of Wakelet to gather relevant resources and comment on how they could be applied in professional situations. These are then commented on and corrected if misunderstanding occurs (authentic application of knowledge)

Case Study:

At Awesome College, lecturers use OneNote Class Notebook to easily check on learners' understanding and use the audio tool to leave timely and effective feedback to help them correct misunderstandings.

Digital Tools:

1. Microsoft/Google Forms
2. Wakelet

The Skills Companies Need Most in 2020

Top 5 Soft Skills

- 1 Creativity -
- 2 Persuasion -
- 3 Collaboration -
- 4 Adaptability -
- 5 Emotional intelligence new

Top 10 Hard Skills

- 1 Blockchain new
- 2 Cloud computing -1
- 3 Analytical reasoning -
- 4 Artificial intelligence -2
- 5 UX design -
- 6 Business analysis +10
- 7 Affiliate marketing new
- 8 Sales -
- 9 Scientific computing +3
- 10 Video production -3

- ✓ Creativity
- ✓ Persuasion
- ✓ Collaboration
- ✓ Adaptability
- ✓ Emotional Intelligence

Using **LinkedIn platform data**, here are the hard and soft skills that companies need most in 2020. While each of these hard skills only apply to specific sections of the workforce, soft skills apply to all.

Again this year, **creativity** is the single most in demand skill for companies to cultivate in their employees.

40% of millennials say flexibility to work from anywhere is a priority when evaluating job opportunities.

Workplace 2030

THE : FUTURE : LABORATORY

NESPRESSO.
PROFESSIONAL

For today's increasingly diverse, multi-generational and agile workforce, the workplace is becoming an extension of who they are. 'Both the workplace and who people work for now represent a growing part of people's identities,' says workplace designer Kelly Robinson. 'As a result, they must better reflect their wants, needs and desires, and facilitate their goals.'

48%

of UK workers believing that AI will help reduce mundane tasks and 43% thinking it will benefit their current job.

02

**Where are we
going?**

The top-15 emerging jobs in the UK.

#1 Artificial Intelligence Specialist

#2 Data Protection Officer

#3 Robotics Engineer

#4 Site Reliability Engineer

#5 Customer Success Specialist

#6 User Researcher

#7 Data Scientist

#8 Sales Development Representative

#9 Cloud Engineer

#10 Cyber Security Specialist

#11 Platform Engineer

#12 Full Stack Engineer

#13 Enterprise Account Executive

#14 DevOps Engineer

#15 Content Designer

03

**How are we
going to get
there?**

Students need opportunities to develop digital skills throughout their educational journey, ensuring that they are equipped for the increasingly digital workplace. There is also evidence that substantial numbers of [learners look to their teachers for support](#) in using digital technology.
